Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CONTENTS.

Aboriginal Funereal Customs in the United States.....*Edwin A. Barber*..... 19
Aboriginal Money of California, Notes on the.....*Lorenzo G. Yates*..... 30
Aboriginal Shell Money.....*R. E. C. Stearns*..... 344
Aboriginal Shell Ornaments and Mr. L. A. Barber's Paper thereon.....*R. E. C. Stearns*..... 473
Æstivation, Variation in.....*W. J. Beal*..... 257
Amblychila Hunting.....*F. H. Snow*..... 731
American Naturalist, The Second Decennary of.....*Editor*..... 1
America, On the Peopling of.....*Aug. R. Grote*..... 221
Animals and Plants, The Colors of.....*Alfred Russel Wallace*..... 641
Animals, The Geographical Distribution of: General Conclusions.....*Alfred Russel Wallace*..... 157
Antelope, The American.....*S. W. Williston*..... 599
Barnacles.....*J. S. Kingsley*..... 102
Biology, On the Study of.....*T. H. Huxley*..... 210
Catastrophism and Evolution.....*Clarence King*..... 449
Chinese Loess Puzzle, The.....*J. D. Whitney*..... 705
Colorado, Explorations made in, Under the Direction of Prof. F. V. Hayden in 1876..... 73
Darter, The Sand.....*D. S. Jordan* and *H. E. Copeland*..... 86
Digital Reduction, On the Laws of.....*John A. Ryder*..... 603
Earth, The Age of this.....*H. P. Malet*..... 286
Evolution in the Netherlands: Testimonial to Mr. Darwin..... 295
Fanning Group of Islands, Some Account of the Natural History of the.....*Thomas H. Streets*..... 65
Fishes, Traces of a Voice in.....*Charles C. Abbott*..... 147
Fleas, Educated.....*W. H. Dall*..... 7
Florida Keys, Hints on the Origin of the Flora and Fauna of the.....*L. F. De Pourtales*..... 137
Foot-Prints, Concerning.....*I. C. Russell*..... 406
Fresh-Water Algæ, Reproduction in.....*Byron R. Halsted*..... 513
Fresh-Water Fishes, On the Distribution of.....*David S. Jordan*..... 607
Glacial Marks on the Pacific and Atlantic Coasts compared *A. S. Packard, Jr.*..... 674
Goby, The Long-Jawed.....*W. N. Lockington*..... 474
Golden-Winged Woodpecker, Notes on the Breeding Habits of the.....*David A. Lyle*..... 747
History of the Earth, On Critical Periods in the, and their Relation to Evolution; on the Quaternary as such a Period.....*Joseph Leconte*..... 540
Indians, Remarks concerning Two Divisions inhabiting Arizona, New Mexico, Utah, and California.....*Edward Palmer*..... 735
Insects, The Use of the Antennæ in.....*L. Trouvelot*..... 193
Land Mollusks, On the Vitality of Certain.....*Robert E. C. Stearns*..... 100
Locust of the West, The Migrations of the Destructive....*A. S. Packard, Jr.*..... 22
Locust, The Rocky Mountain.....*C. V. Riley*..... 663
Microtome, The Sledge.....*Charles Sedgwick Minot*..... 204
Mind in Birds, Glimpses of.....*Charles C. Abbott*..... 276
Moqui, Seven Towns of.....*E. A. Barber*..... 728
Mountain Axes in the Neighborhood of Cumberland Gap, Notes on the Age and the Structure of the several.....*N. S. Shaler*..... 385
Museum Mite, The.....*Andrew Murray*..... 479
Natural Selection? Is Protective Mimicry due to.....*Alfred W. Bennett*..... 3

Nevada and Arizona, The Distribution of Vegetation in Portions of. ... *W. J. Hoffman* ... 336
New Hampshire and Vermont, Observations upon the Distribution of Plants in. ... *William F. Flint* ... 89
New Zealand, The Giant Birds of. ... *I. C. Russell* ... 11
North America, The Suessonian Fauna in ... *E. D. Cope* ... 95

RECENT LITERATURE.

American Insectivorous Mammals, 613; America, Wild Flowers of, 40, 753; Animal Morphology, Macalister's, 111; Baird's Annual Record of Science and Industry for 187[illegible] 483; Birds, Boucard's Catalogue of, 40; Bobretzky's Researches on the Development of Cephalopoda, 681; Brehm's Animal Life, 557; Caton's Deer of America, 354; Cope's Vertebrate Palæontology of New Mexico, 750; Dolbear's Art of Projecting, 301; Echinoids, Lovén's Studies on the, 110; Ganin's Metamorphoses of Insects, 423; Geological Survey of Kentucky, Memoirs of, 165; Haeckel's History of Creation, 167; Hyatt's North American Sponges, 560; Insects, Glover's Illustrations of, 110; Johnson's Cyclopædia, 168; List of the Vertebrated Animals in the London Zoölogical Garden, 681; Mivart's Lessons from Nature, 300; Murray's Economic Entomology, 482; Naturalist, Gurney's Rambles of a, 38; Ninth Annual Report of the U. S. Geological and Geographical Survey of the Territories, 681; North American Fur-Bearing Animals, 617; Recent Ornithological Papers, 615; Science, The Warfare of, 168; Transmutation, Weismann's Final Causes of, 109; United States Commission of Fish and Fisheries, 559; Wallace's Geographical Distribution of Animals, 232; Wheeler's Survey, Zoölogy of, 108.

GENERAL NOTES.

Botany. — Absorption of Carbonic Acid by the Vegetable Cell Wall, 240; Acer Dasycarpum, 485; Algæ, sets of, 366; Alpine Plants, 683; Analytical Tables, 306; Austrian Woody Plants, The Size of the Leaves of, 684; Botanical Club at Providence, R. I., 43; Botanical Directory, 684; Botanical Papers in Recent Periodicals, 43, 115, 178, 241, 307, 366, 434, 490, 564, 621, 685; Catalogue of Wisconsin Plants, 684; Celtis occidentalis, 490; Chlorophyll-Granules, The Effect of Frost on, 176; Cross-Fertilization of Aristolochia, 303; Crystallizable Sugar, On the Transformations of, into Cellulosic Products, 305; Dichogamy of Agave, 176; Double Saxifrage, 432; Fertilization of Gentiana Andrewsii, 113; Fertilization of Flowers by Birds, 754; Fluorescence of Calycanthus, 304; Fungi, The Sexual Reproduction of, 43; Gentiana Amarella L. var. Acuta (G. Acuta Mx.), 620; Heather in Nova Scotia, 305; Homogone and Heterogone Flowers, 42; Illustrations of North American Ferns, 485; Ipomœa setosa, 114; Iris, 306; Kew Herbarium, The New Building for the, 621; Large Trunks of Kalmia latifolia, 175; Lichenes found growing within Twenty Miles of Yale College, A List of, 170; Minot's New England Birds; Additions, 175; Modification of the Glumes of Grasses depending on the Sex of the Flowers, 240; Notes on some Injurious Fungi, by Professor W. G. Farlow, 620; Oak, A Madrona swallows an, 42; Oaks, Living and Fossil, of Europe compared by De Saporta, 240; Objects of the Diversities in the Mode of Arrangement of the Floral Organs, 115; Observations on Silphium laciniatum, the so-called Compass Plant, 486; Onion Smut, 365; Orchis rotundifolia, 431; Origin of Varieties; Two Illustrations, 113; Ostrya Virginica, A Remarkably Large, 683; Phellodendron, 239; Phyllotaxis of Cones, 177; Pinus mitis, 304; Plants, How they guard against Animals and Bad Weather, 683; Plants of Brazil and Germany, 490; Plasma, On the Passage of, through Living Unperforated Membranes, 239; Poisonous Grasses, 682; Porosity of Wood, On the, 306, 364; Precocity of Blossoming in the Orange, 489; Respiration of Roots, 305; Salix candida in Essex County, 432; Sarracenia variolaris, 432, 564; Saxifraga Virginiensis, 366; Scientific German, 684; Silphium laciniatum, 564; Starch in Chlorophyll-Granules, The Production of, 175; Three Feet of Fern-Spores, 305; Three-Flowered Sanguinaria, 431; Two-Flowered Arethusa, 431; Vegetable Digestion, 360, Violets, 561.

Zoölogy. — Amphioxus in the Bermudas, 367; Animals, A New Sub-Kingdom of, 178; Arkan-

sas, Winter Birds of, 397; Beaver, Notes on the, 371; Black Rattlesnake, 623; Black Squirrel, The, 242; Butterflies, A Flight of, 244; Cockroach, The Phenomena of Digestion in the, 243; Criticisms of Haeckel, 368; Deer, Note on the Deformed Antler of a, 242; Destruction of Birds by Telegraph Wires, 686; Development of Unfertilized Eggs of Vertebrates and Mollusca, 622; Embryo Pipa, The Branchiæ of, 491; Entomological Works, 367; Food of the Skunk, 687; Jigger Flea, The, 756; Hawaiian Islands, The Common Crab at the, 241; Mammals new to the United States Fauna, 492; Mountain Boomer, or Showtl, 434; Northern Range of the Bison, 624; Note on the Mexican Spermophilus, 688; Oregon Birds, Notes on some, 44; Paper Argonaut captured at Long Branch, N. J., 243; Papilio Cresphontes in New England, 688; Partiality of White Butterflies for White Flowers, 243; Rare Snakes from Florida, 565; Raven and the Sooty Tern in Williamstown, Mass., The, 243; Red-Bellied Nut-Hatch (Sitta Canadensis) nesting on the Ground, 565; Red-Headed Woodpecker Carnivorous, 308; Restoration of the Sivatherium, 435; Serpents and Lizards, On a Transitory Fœtal Structure in the Embryos of, 566; Spontaneous Adaptation of Color in the Lizard, 493; Supposed Development of Pickerel without Fecundation, 494; Tenacity of Life shown by some Marine Mollusks, 687; Thelyphonus giganteus poisonous, 367; Titicaca, Lake, The Crustacea of, 116; Whistler, Habits of, 44.

Anthropology. — Anthropological News, 46, 118, 181, 245, 308, 426, 496, 567, 624, 690, 756; Antiquities near Naples, 119; Archæological Exchange Club, 180; Christening Ceremony of the Seminole Indians, 689; Cordate Ornament, 45, 118; Cremation among the Sitka Indians, 372; Examination of Indian Mounds, on Rock River, at Sterling, Illinois, 688; Man in the Pliocene in America, 689; Stone Implements, Classification of, 495.

Geology and Palæontology. — Alleghany Division of the Appalachian Range within the Hudson Valley, On the Existence of the, 627; Brain of Coryphodon, 375; Cretaceous Period, The Sea-Serpents of the, 311; Discovery of Jointed Limbs in Trilobites, 692; Fossils, New Vertebrate, 628; Genus Beatricea in Kentucky, On the Occurrence of the, 628; Geological Survey, 47; Geology of Ithaca, New York, and the Vicinity, 49; Glaciers, The Greenland, 694; Herbivorous Dinosauria of the Lignitic Period, The Dentition of the, 311; Influence of Geological Changes of the Earth's Axis of Rotation, 499; Lælaps in Montana, The Discovery of, 311; Limestone, Trenton, at Minneapolis, 247; Mammalian Brain, The Lowest, 312; Nature of the Legs of Trilobites, 439; Newberry's Geology of Parts of New Mexico and Utah, 120; Palæontology of the Western Territories, M. M. Gaudry and De Saporta on the, 184; Pan-Ice Work and Glacial Marks in Labrador, 568; Recent and Fossil Fishes, On the Classification of the, 501; Recent Palæontological Discoveries, 756; Recent Palæontological Discoveries in the West, 500; Remains of a Huge Saurian in Pennsylvania, 628; Rominger's Fossil Corals of Michigan, 249; Saurian, The Largest Known, 628; Scudder on Fossil Insects from British Columbia, 374; Whiteaves' Mesozoic Fossils of British Columbia, 248; Wyoming, New Fossil Fishes from, 570.

Geography and Exploration. — Exploration in Patagonia, 630; Explorations of the Polaris Expedition to the North Pole, 51; Geographical News, 375, 440, 571, 630, 696, 757; Geographical Progress in 1876, 249; Great Salt Lake, Recent Changes of Level of the, 121; Great Salt Lake, Rise of, 570; Heights in the Bolivian Andes, 630; Ludlow's Reconnaissance in Montana, 376; New York, Topographical Survey of, 313; Recent Geographical Progress, 377; Simpson's Explorations across the Great Basin of Utah, 120; Stanley, Farther news from, 313; Stanley's Journey across Africa, 695; United States Geological and Geographical Survey of the Territories, the Geographical Work of, 439; Warren's Improvements of the Fox and Wisconsin Rivers, 120.

Microscopy. — American Microscopy, A Foreign View of, 314; Boston Microscopal Society, 379; Cuproscheelite, 122; Detection of Criminals by Hand Marks, 441; Diatoms, Cleaning with Glycerine, 121; Diphtheria, 377; Exchanges, 442, 503, 572, 634; Eye-Piece, E. Gundlach's New Periscopic, 631; False Light Excluder, 188; Finger, Another Mechanical, 571; Fingers, The New Mechanical, 697; Fossil Diatoms from South Australia, 377; Keith's Heliostat, 758; Identity of the Red Blood Corpuscles in Different Human Races, 188; Illuminating Adjustment, The New Model, 501; Illumination in Connection with Polarization, 53; Laboratory Work in Microscopy, 254; Microscope, A New Students', 379; Microscope, New Physician's, 572; Microscopical Structure of Amber, 187; Microscopist's Annual, 698; Microscopy at Nashville, 440; Mounting in Dammar, 633; Obituary, 318; Objectives as Illuminators, 633; Objects, New, 188; Opaque Glass Slides, 634; Organisms in Rochester Hydrant Water, 441; Personal, 378; Pollen Tubes for the Microscope, 54; Powdered Sulphur, 442; Practical Microscopy, 379; Printed Labels, 254; Rock Sections, 378; San Francisco Microscopical Society, 55, 252; Second-Hand Microscopes, 254 Shell Sand from the Bermudas, 441; Schrauer's Microscopes, 757; Spencer's Objectives, 503; Tin Cells, 572; Wenham's Reflex Illuminator, A Modification of, 697; Zentmayer's Turn-Table, 449.

SCIENTIFIC NEWS, 55, 122, 190, 254, 318, 380, 442, 504, 573, 634, 699, 758.

PROCEEDINGS OF SOCIETIES, 57, 124, 190, 255, 382, 445, 510, 636, 703, 758

SCIENTIFIC SERIALS, 64, 128, 191, 256, 320, 384, 448, 512, 576, 639, 703
